Evaluation Scales and Procedures

EVALUATION SCALES

Applicants and competitors will be evaluated using the following scales:

Yes/No

The competitor receives 1 point for a score of “Yes”, and zero points for a score of “No”.

Numeric (Latte Art): 0-3

Competitors receive a score from 0 to 3 for each the factors *Contrast*, *Harmony*, *size & position in cup*, *Foam Quality* and *Identification of pattern* according to the criteria outlined in the table below. Half points are not permissible.

	Contrast	Harmony, size & position in cup	Foam Quality	Identification of pattern
0	None to evaluate	None to evaluate	None to evaluate	None to evaluate
1	The contrast is poor, hindering the clear delineation of the pattern. A significant portion of the white foam appears to be integrated with the crema.	For a right-handed drinker, when the handle is positioned at 3 o'clock, the pattern appears upside-down.	Level 4-5 according to SCA foam quality standards.	Pattern cannot be clearly identified,
2	There is some marbling between the white foam and brown crema, although the pattern can be clearly identified. Areas of beige can be seen where the crema and foam have mixed.	For right-handed drinkers, the pattern is presented with its base between 4 and 8 o'clock within the cup. The size of the pattern is slightly too small or too big for the space available. The pattern is poorly positioned in the cup (e.g. touching the rim). If multiplate patterns are poured, they are unbalanced albeit clearly identifiable.	Level 2-3 according to SCA foam quality standards.	Pattern can be clearly identified.
3	Clean white foam sharply contrasts against the rich colour of the crema. This sharp contrast is demonstrated throughout most of the pattern.	For right-handed drinkers, the pattern is presented with its base at 6 o'clock (tolerance between 5 and 7 o'clock) and the handle at 3 o'clock. The size of the pattern suits the size of the cup, big enough to fill the space whilst leaving space for a frame of crema. If multiple patterns are poured, they should be complimentary and attractive.	Level 1-2 according to SCA foam quality standards.	Pattern can be clearly identified and is attractive.

SCA FOAM QUALITY STANDARDS

Level 1	<ul style="list-style-type: none"> • Micro-foam has been produced. • Smooth, shiny, and moist. • No visible bubbles.
Level 2	<ul style="list-style-type: none"> • Micro-foam has been produced. • Smooth and moist. • Very few small bubbles (<0.5mm diameter).
Level 3	<ul style="list-style-type: none"> • Micro-foam has been produced. • Smooth and moist. • Micro-foam texture with many small (<1mm diameter) and very few larger (1-2mm diameter) bubbles.
Level 4	<ul style="list-style-type: none"> • Many large (>1mm + diameter) bubbles are present. • Texture is uneven/dull/dry.
Level 5	<ul style="list-style-type: none"> • Many large (>1mm + diameter) bubbles are present. • Very dry and uneven looking like it has been placed on by standard spoon/spatula rather than poured.

Numeric (Quality): 0-6

The competitor's performance will be evaluated on a scale of 0 to 6. Low numbers indicate poorer performance, and higher scores indicate a better performance with each point corresponding to the quality level outlined in the table below. Half points are permissible in the range of 1 to 6.

0	None to evaluate
1	Insufficient
2	Average
3	Good
4	Very Good
5	Excellent
6	Outstanding

Numeric (Overall Impression): 0-3

The Numeric (Overall Impression) scale is used by the head judge to evaluate a competitor's overall impression in each category. The judge takes the criteria used by the sensory and technical judges into account for their evaluation. Half points are not permissible.

0	None to evaluate
1	Overall impression in the range of acceptable to average.

EVALUATION PRODECURES

APPLICATION SCORESHEET

Latte Art Evaluation

Judges will award points from 0-3 according to the Numeric (Latte Art) scale.

Barista Skills Evaluation

The judges are looking for applicants that demonstrate mastery of the technique and craft in coffee preparation and latte art. Judges will evaluate the applicant's overall movement and flow at the workstation and use of tools, equipment, and accessories.

The applicant's proficiency in *workflow and station management* will be awarded a score from 0-6 according to the Numeric (Quality) scale.

Signature Drink Evaluation

The signature drink should demonstrate an applicant's creativity and skill to create a coffee-based beverage that is visually appealing with exceptional taste. The signature beverage must be liquid and contain at least one shot of espresso (30ml +/- 5mL). The flavour of espresso must be present in the drink. It is permitted to use alcohol in the signature beverage.

The applicant's proficiency in the 3 areas of *presentation, recipe creativity, and harmony of ingredients* will be awarded a score from 0-6 according to the Numeric (Quality) scale. Half points may be awarded.

SENSORY SCORESHEET

Espresso Evaluation

a) Visual Appeal

Judges will evaluate the presence of the crema in the vessel. To be awarded a "Yes", the crema must cover the whole surface of the espresso, without any holes or broken areas.

b) Quality of Taste Experience

Judges will evaluate the quality of Taste Experience using the Numeric (Quality Scale) against a benchmark established prior to the commencement of the competition and award scores from 0-6.

Cappuccino Evaluation

a) Visual Appeal of Latte Art

Judges will award scores from 0-3 according to the Numeric (Latte Art) scale.

b) Quality of Taste Experience

Judges will evaluate the quality of Taste Experience using the Numeric (Quality Scale) against a benchmark established prior to the commencement of the competition and award scores from 0-6.

Signature Drink Evaluation

Judges will evaluate the Signature Drink using the Numeric (Quality Scale) and award scores from 0-6.

→ Well Explained & Introduced: The competitor must explain their signature beverage to the judges. To receive a high score, the explanation should include the ingredients, preparation methods and flavours and aromas of the drink. The competitor may instruct the judges on how to drink the beverage (e.g. sip, stir) if they wish. If no instructions are given, the judges will individually choose how to evaluate the signature beverage.

More than a moment

- Presentation & accuracy: Judges will evaluate the presentation of the drink for creativity and visual appeal. In addition, they will assess the taste of the drink compared to the description and explanation of the beverage provided for accuracy.
- Taste Experience: Judges will evaluate how well the taste components of the beverage fit together and complement each other in the total consumption experience. Signature Drinks that create new and/or unique experiences may receive higher points. Signature Drinks that mimic the flavour of an espresso may not necessarily receive higher points. If the beverage is unbalanced, or a taste component detracts from the experience of the beverage, the score will be reduced.

TECHNICAL SCORESHEET

All criteria included on the technical scoresheet will be evaluated using the Yes/No evaluation scale. The competitor receives 1 point for a score of “Yes”, and zero points for a score of “No”. The criteria that each competitor must fulfill to receive a “Yes” is outlined below.

Espresso Evaluation

- Flushes the grouphead: must occur after the removal of the portafilter and prior to each extraction.
- Dry/clean filter basket before dosing: filter basket must be completely dry and clean prior to dosing.
- Acceptable spill/waste when dosing/grinding: refers to ground coffee left unused during the competition/performance. Spill/waste of more than 5 grams of unused coffee per beverage category will result in a 0 score.
- Consistent dosing & Tamping: the competitor should evenly distribute the coffee grounds, followed by levelled tamping of adequate pressure.
- Cleans portafilters (before insert): the competitor must clean the basket rim and side flanges of the portafilter before inserting into the machine.
- Insert & immediate brew: the competitor must begin the extraction immediately after inserting the portafilter into the machine without any delay.
- Extraction time (20 – 30 seconds): the extraction time must be within a range of 20 to 30 seconds.

Cappuccino Evaluation

Technical skills: same as technical Espresso Evaluation criteria above.

Milk:

- Empty/clean pitcher at start: the pitcher must not have been filled during the preparation time. The competitor should pour cold, fresh milk into a clean pitcher.
- Purges the steam wand before steaming: the competitor should purge the steam wand before insertion into the milk pitcher.
- Cleans steam wand after steaming: the steam wand should be cleaned with a dedicated steam wand towel.
- Purges the steam wand after steaming: the competitor should purge the steam wand after steaming the milk.
- Acceptable milk waste at end (less than 60ml): the pitcher should be empty after the milk beverage has been prepared. Milk waste less than 60ml is acceptable.

Signature Drink Evaluation

Same as technical Espresso Evaluation criteria above.

Technical Evaluation

- a) Station Management/Clean working area at end: the technical judge will evaluate whether the competitor fulfills the following criteria to an acceptable standard:

More than a moment

- Overall workflow demonstrates proficiency and expertise.
 - Correct use and operations of espresso machine and grinder.
 - Clean and well-maintained workstation (equipment, counters, towels and pitchers) and orderly management of coffee and ingredients (milk, signature beverage ingredients).
 - Any spills that occurred are cleaned up during the competition time.
 - No liquids or ingredients should be placed on top of the machine.
- b) Cleans portafilter spouts:
- The competitor should remove any water of grounds on the portafilter spouts by cleaning the spouts. This can be achieved by rinsing, using a towel and/or wiping with fingers.
- c) General hygiene throughout presentation: Judges will assess the competitors' sanitary practices throughout the entire presentation. Examples of unacceptable practices include touching the hands to the face, mouth or floor and then using the hands for beverage preparation.
- d) Proper usage of cloths: Judges will assess the competitors correct and sanitary usage of cloths. The competitor should use one cloth for the steam wand, one for cleaning the filter basket and one for the workstation. Examples of unsanitary practices include using a cloth that has been dropped on the ground, mixing cloths for different uses, touching the cloth to the face or mouth.

APPLICATION EVALUATION PROCEDURE

APPLICATION EVALUATION PROCEDURE

Latte Art Evaluation

Judges will award points from 0-3 according to the Numeric (Latte Art) scale. A score of 0 may be awarded if there is none to evaluate. Latte Art is defined as a pattern produced by pouring steamed milk into an espresso shot. The assessment of Latte Art centres on the overall quality and visual appeal, not creativity. Participants are not awarded points for intricate and/or complex latte art designs; rather, emphasis is placed on their proficiency in executing a selected pattern.

Barista Skills Evaluation

The judges are looking for applicants that demonstrate mastery of the technique and craft in coffee preparation and latte art. Judges will evaluate the applicant's overall workflow and use of tools, equipment, and accessories as well as their movement and flow at the workstation.

The applicant's proficiency in *workflow and station management* will be awarded a score from 0-6 according to the Numeric (Quality) scale. Half points may be awarded.

Signature Drink Evaluation

The signature drink should demonstrate an applicant's creativity and skill to create a coffee-based beverage that is visually appealing with exceptional taste. The signature beverage must be liquid and contain at least one shot of espresso (30ml +/- 5mL). The flavour of espresso must be present in the drink. It is permitted to use alcohol in the signature beverage.

The applicant's proficiency in the 3 areas of *presentation, recipe creativity, and harmony of ingredients* will be awarded a score from 0-6 according to the Numeric (Quality) scale. Half points may be awarded.

Coffee Beverage Definitions

Espresso

Espresso is a 1 fl. oz. beverage (30mL +/- 5mL, including crema) made from ground coffee, poured from 1 side of a double portafilter in 1 continuous extraction.

Coffee is the accumulation of roasted product of the seed of the fruit of a plant of the genus Coffea.

All judges must be served a full espresso. If the shot does not comply with the espresso definition, then taste and/or tactile scores will reflect the resulting sensory experience. Espresso may be prepared with various amounts of coffee.

Espresso will be brewed on the sponsored machine with brewing temperature set between 90.5-96 degrees Celsius (195-205 degrees Fahrenheit). Individual group heads may be set to different temperatures within this range. However, each beverage course should be served at a consistent temperature. Competition Bodies are required to use only one temperature across group heads.

The espresso machine brewing pressure will be set between 8.5 and 9.5 bars.

A 20-30 second extraction time is required.

Crema should be present when espresso is served, with no break in coverage.

Espresso must be served in a Julius Meinl espresso cup from which judges must be able to drink as required without any functional detriment to their ability to score accurately; this includes but is not exclusive to: vessel being too hot, unable to hold and drink from vessel safely, judges unable to execute espresso evaluation protocol. Espresso must be served to the judges with an appropriate spoon, napkin, and unflavoured water.

Nothing other than ground coffee and water may be placed in the portafilters, otherwise the beverage will receive 0 points on all scores available on the technical and sensory scoresheets in the Espresso category.

Cappuccino

A cappuccino is a combination of 1 single shot of espresso (per the definition of espresso in the "Espresso" section) and steamed milk, which should produce a harmonious balance of rich, sweet milk and espresso.

It is recommended that competitors use cow's milk for their milk beverages. In the event a competitor intends to use an alternative milk product, they are required to formally notify the organizer and request approval well in advance of the competition date. Cappuccinos should be served with latte art. Latte art is defined as a pattern produced by pouring steamed milk into an espresso shot. Latte art expression may take any pattern the competitor chooses. Competitors are required to inform the judges of their intended pattern (e.g. heart, tulip) at the beginning of their competition time.

Cappuccinos must be served in a Julius Meinl Cappuccino cup from which judges must be able to drink as required without any functional detriment to their ability to score accurately; this includes but is not exclusive to vessel being too hot, unable to hold and drink from vessel safely. If there is a functional detriment to a judges' ability to score, the "Attention to Details" score will be impacted.

No additional ingredients or toppings, including but not limited to sugar, spices, or powdered flavourings will be allowed. This also applies to ingredients that are already present in milks, as they are available. No additions may be made. If added, the competitor will receive 0 points in the “Taste” category.

Milk Beverages must be served to the judges with a napkin and unflavoured water.

Nothing other than ground coffee and water may be placed in the portafilters, otherwise the milk beverage will receive 0 points on all scores available on the technical and sensory scoresheets in the Cappuccino category.

Signature Beverage

A signature drink demonstrates a competitor’s creativity and skill to create an appealing and individual espresso-focused beverage.

The signature drink should be a liquid beverage; the judges must be able to drink it.

Each signature beverage must contain a minimum of 1 espresso shot (per the definition of espresso in the “Espresso” section) otherwise the competitor will receive a score of 0 points for “Taste Experience” on the sensory scoresheets in the signature beverage category for that corresponding beverage.

Espresso used in the signature beverage must be prepared during the competitor’s performance time, otherwise the signature beverage will receive a score of 0 for “Taste Experience” on the sensory scoresheets in the Signature Drink category.

A predominant taste of espresso must be present, otherwise the “Taste Experience” score will reflect the resulting sensory experience.

The signature beverage may be served at any consumable temperature.

Ingredients containing alcohol are permitted for use in the Signature Drink category. Competitors are advised to ensure that the presence of alcohol within their beverages does not overpower the overall taste, maintaining a balanced flavour profile.

All ingredients must be disclosed upon request. Competitors must bring the original packaging of all ingredients used in their signature beverage for inspection by judges to verify ingredients. If the competitor does not provide original packaging when asked, the signature beverage will receive 0 points in all categories available on the sensory scoresheets in the signature beverage category.

Signature beverage ingredients should be prepared and assembled on-site during the competition time. The preparation of a signature beverage is captured in the “Well explained, introduced, and prepared” category on the sensory scoresheet. Preparation in advance of the competition time is necessary for certain ingredients (e.g., a 24-hour infusion) and is accepted.

Nothing other than ground coffee and water may be placed in the portafilters, otherwise the signature beverage will receive 0 points in all categories available on the technical and sensory scoresheets in the signature beverage category.
